Iliya Baltadzhiev

Full-Stack Developer

Varna, Bulgaria

I develop applications with Java, Spring Boot, React and TypeScript. My work also spans Ansible automation, databases and troubleshooting the Linux environments that run our services.

Experience

Full-Stack Developer

T&D Engineering | July 2025 - present

- Develop backend services with Java and Spring Boot and work with PostgreSQL.
- Build web interfaces with React and TypeScript.
- Automate tasks with Ansible.
- Diagnose and resolve issues on the Linux servers that host our services.
